Porsche Cayman GT4
Suspension Upgrade Guide
Road, Fast-Road & Track Setups Explained

The Porsche Cayman GT4 is a driver's car with incredible potential. With the right suspension upgrades, you can reduce understeer, improve grip and braking stability, and get the most out of your Cayman on the road and track.

Common Handling Problems

In factory form, the Cayman GT4 is set up to be safe and accessible, which can lead to:

- Mid-corner understeer
- Limited front axle grip
- Excessive front tyre wear during high speed driving
- Limited steering communication

These issues can be **addressed with** proven **suspension upgrades and a professional geometry setup.**

Key Benefits of Upgrades

With the right suspension components and setup, you can expect:

- Reduced understeer and improved balance
- Increased cornering grip
- Enhanced braking stability
- Better traction and tyre wear
- Sharper steering response
- More confidence on road and track

Cayman GT4 camber plates for increased adjustability

Essential Upgrades for the Cayman GT4

A range of suspension components designed to unlock the full potential of the 981 and 718 Cayman GT4.

Camber & Caster Plates

Allow increased camber adjustment for more front-end grip and sharper turn-in.

Adjustable Rear Toe Arms

Improve rear toe control to enhance traction and stability under braking and cornering.

Springs & Coilovers

Lower the centre of gravity, reduce body roll and improve the overall balance.

Complete Handling Packages

Kinematics kits and Stage 2 packages for track-focused setups (305 or 325 rear tyres).

Professional Geometry Setup

A full geometry alignment is essential after installing new suspension components. By correctly setting camber, toe and caster (where available), you'll maximise grip, stability and tyre life.

Key benefits:

- Sharper steering response
- Increased cornering grip
- Improved rear traction
- Enhanced braking stability

Supply, Fitment & Setup by Tech 9

As Porsche specialists, we can supply and install Suspension Secrets components, or fit parts you have already purchased. We can also carry out professional geometry, alignment and corner weighting where required.
