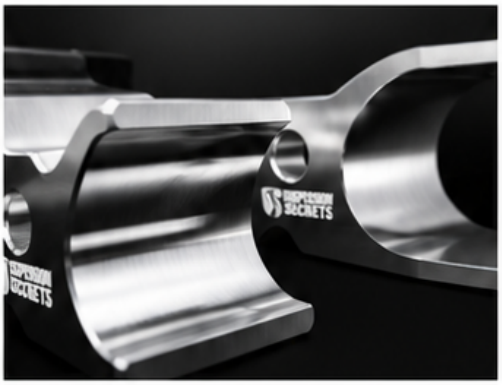
Suspension Secrets Front Camber Blocks

Porsche 911 GT3 RS (992)

Installed by Tech9



Product specifics

What they do

Designed for the Porsche 911 GT3 RS (992), these front camber blocks increase the available front negative camber beyond the factory range. Suspension Secrets states that the standard Porsche blocks are limited to -2.8°, while these blocks allow up to -4.0° for fast-road and track-day use.

Stated benefits

- Increased front axle grip
- Improved steering feel
- Reduced tyre wear
- Greatly reduced understeer
- Increased cornering speed on road and track
